

 **GEARView™ QC**

GEARView™ QC is a simple and powerful Quality Control tool that makes day-to-day workflow easier for PACS administrators and technologists. Based on **GEARView**, PACSGEAR's medical image and results visualization technology, **GEARView QC** provides intuitive functionality for viewing, importing, editing, burning and sending DICOM studies to PACS/EHR. **GEARView QC** lets PACS administrators and technologists fix common demographic errors in any DICOM field, as well as visually edit studies to split/combine exams or add/remove images. Studies can also be anonymized by masking burned-in patient information.

A simple and powerful QC tool for PACS/EHR

Why GEARView QC?

- ⚙ **Easy** – View, import, edit, burn and send DICOM studies to PACS/EHR
- ⚙ **Fast** – Visual editing to split/combine studies or add/remove images
- ⚙ **“It just works”**– Solves day-to-day PACS administration issues

How GEARView QC Works

Step 1 Select

Select patient

Receive studies via DICOM Q/R, WADO, DICOM CD/DVD import, directly from modalities, or via network transfers from outside facilities.

Step 2 Edit

Edit any field

Visually split into multiple series

Remove burned-in patient information with mask tools

Step 3 Send

Send to PACS/EHR, burn DICOM CDs/DVDs with **MediaWriter**, or export to local file.

GEARView QC Features

- ⚙ Edit any DICOM patient, study, series or image tag.
- ⚙ Visually edit studies directly by splitting/combining or adding/removing images.
- ⚙ Anonymize DICOM studies by masking burned-in patient information.
- ⚙ Import, burn and send DICOM studies to PACS/EHR.
- ⚙ Interface to RIS worklist or DICOM Archive to provide automatic loading of patient demographics for ease of use. DICOM Modality Worklist (MWL) ensures an accurate match with patient studies.
