

GEARView™ QC

GEARView™ QC is a simple and powerful Quality Control tool that makes day-to-day PACS administration easier. Based on **GEARView**, PACSGEAR's medical image and results visualization technology, **GEARView QC** provides intuitive functionality for viewing, importing, editing, printing, burning and sending DICOM studies to PACS. **GEARView QC** lets PACS administrators fix common demographic errors in any DICOM field, as well as visually edit studies to split/combine exams or add/remove images. Studies can also be anonymized by masking burned-in annotations.

A companion product, **Stacker™** can be added to automate the manual process of importing DICOM CDs/DVDs.

A simple and powerful QC tool for PACS

Why GEARView QC?

- ⚙ **Easy** – View, import, edit, print, burn and send DICOM studies to PACS
- ⚙ **Fast** – Visual editing to split/combine studies or add/remove images
- ⚙ **“It just works”** – Solves day-to-day PACS administration issues

How GEARView QC Works

Step 1 Select

Select patient

Receive studies via DICOM Q/R, WADO, DICOM CD/DVD import, directly from modalities, or via network transfers from outside facilities.

Step 2 Edit

Edit any field

Visually split into multiple series

Remove burned-in annotations with shutter and crop tools

Step 3 Send

Commit change

Send to PACS or DICOM printer, burn DICOM CDs/DVDs, or export to local file.

Need to automate the manual DICOM CD/DVD import process? Add **Stacker™** to create a complete DICOM CD/DVD import solution.

GEARView QC Features

- ⚙ Edit any DICOM patient, study, series or image tag.
- ⚙ Visually edit studies directly by splitting/combining or adding/removing images.
- ⚙ Anonymize DICOM studies by masking burned-in annotations.
- ⚙ Import, print, burn and send DICOM studies to PACS.
- ⚙ Includes embedded DICOM viewer, GEARView.
- ⚙ Interface to RIS worklist or DICOM Archive to provide automatic loading of patient demographics for ease of use. DICOM Modality Worklist (MWL) ensures an accurate match with patient studies. Includes extensive bar code support for rapid demographic entry.
- ⚙ Includes PacsSCAN document scanning – scan and send documents to PACS/EHR using TWAIN compliant scanners.
